

Requests to Remove Contracts from the PPIRS Compliance Report

Requests to have contracts removed from the PPIRS Compliance Report are limited to the below listed criteria. Removal requests must be submitted in writing and should cite the specific exceptions below. Send requests to: webptsmh@navy.mil.

1. AbilityOne contracts -- Only Federal Agencies can remove AbilityOne actions as allowed by FAR Subpart 8.7. This exception does NOT apply to DoD contracts.
2. Product and Service Code (PSC) B510, B517, B518, B526, B532, B543 -- These specific PSCs are eligible for removal if they have been incorrectly mapped to ACASS, or when entered in CPARS but under the SAT.
3. Old Contract Numbers -- Certain actions with incorrect contract numbers as a result of the Contract Numbering System Change in FPDS are eligible to be removed. Note, in order to remove these actions the OLD contract number needs to have been replaced in FPDS with the new contract number.
4. Incorrect contracts entered in FPDS -- In the event that contracts have been erroneously entered in FPDS, those contracts may be removed from the Compliance Report AFTER the contract has been removed from FPDS.
5. Contracts at the minimum dollar thresholds -- Contracts at or not exceeding the minimum dollar threshold are eligible to be removed. Example: For Civilian agencies, contracts at exactly \$150,000.00 are eligible to be removed per FAR 42.1502(b). For DoD, specific thresholds are identified in DFARS 242.1502 and contained in DoD Class Deviation 2013-O0018.
6. Fuels and Health Care contracts -- DPAP has raised thresholds for "Fuels" in the operations support business sector and "health care" in the services sector to \$5 million and \$1 million, respectively . Actions below these thresholds can be submitted for removal (DoD only).
